

ESTIMATE ANALYZER

CUSTOMIZABLE • INTUITIVE • POWERFUL

Micro Estimating Systems Estimate Analyzer 1.0

A BizOptix™ Solution by CTGI

What do you get when you combine the industry-leading estimation software with an innovative data analysis solution?

- More than 42 customizable folders that answer common questions about your customers, salespeople, purchase orders and work centers.
- An innovative wizard interface to answer new questions about your estimates without learning a report writing language or hiring a consultant.
- Automatic recognition of customized fields so you can analyze information based on the way your system is configured.
- The ability to slice and dice information like never before!
- Drill down to see the details... the numbers behind the numbers.
- Leverage industry-standard graphing capabilities to let you view your information in a way that makes sense to you.

All this with the power and familiarity of Microsoft Excel.
